(silks & linens - no imprinting/indentations)

PARAPHERNALIA

(big & bold patterns - no imprinting/indentations)

DISCLAIMER

(digital swatch use terms & usage agreement)

If you are certain you are going to be working with our albums, we highly encourage you to invest in swatch kits. There is no better way to get a sense of these materials and present all the options you can offer to your clients.

Swatch kits are available for purchase at a very affordable price and come in attractive presentation boxes & tins.

There are always swatches available to view online & via this PDF, however, colors can vary greatly from monitor to monitor and will never be truly exact. It is also nearly impossible to see the true character of some of the finely crafted, hand-tooled leathers on screen or in print.

Digital swatches are material approximations for representational and supplemental purposes *only* and are not meant to replace actual swatches.
